

## Honey Dew Mead > Die Hochland Imker > Austria

---

The bees collect honey dew in the spruce and wine woods of the Austrian Mountains. The sweet juice glitters like dew drops on the spruce and pine needles. The dark brown to greenish black shimmering honey is Austria's highly regarded "forest honey," renowned for its strong, spicy, and malty aromas.

### ■ Mead Collection

**Style:** Honey  
collected from  
Pine trees

**Alc./Vol.:** 12.7%

The "Honigtau Met" is a unique product of the spruce forests of the climatically harsh northern regions of Austria.
