

Tibir > Birrifico Montegioco > Montegioco, Italy

Tibir belongs to a new class which has been growing up during the last few years and it has not a really definite name. In fact even if it is a fruit beer, an already existing category, its liaison with wine represents its distinguishing mark. Tibir for instance is produced using Timorasso, local white grapes, and wine yeast but some other techniques include a barrique-maturation-method.

Appearance: Golden with thin and compact head, highly carbonated.

Aroma: Floral and fruity aroma which recalls pear and rose.

Flavor: Great freshness due to its sparkling consistency and sourness from the Timorasso wine grapes.
